GREAT IMPROVEMENT IN

Planing, Tongueing, and Grooving Lumber

JOSEPH P WOOLBURY'S

Patent Planing Machine.

THE Subscriber having received Letters Patent for a stationary Cutter, Planing, Tongueing and Grooving Machine now offers for sale Machines and Rights to use the same. This machine will plane 6 000 feet of boards in any uniform thickness in one hour producing a better finished surface than it is possible to plane by any other machine now known not excepting the Daniel Planer and is peculiarly adapted to plane and joint clapboards or weather boarding and will do the work faster and better than any machine heretofore invented. This machine is so arranged that it lays the board with an unbroken shaving the whole width and length of the material and does not take more than two thirds the power that is required to do an equal amount of work by the Rotary Cutter Cylinder now in common use. The construction and organization of this machine is such that any thereon in use. Communications for particulars cheerfully responded to by the subscriber (post paid) Boston Mass.

One of the above Planing Machines may be seen in operation by calling on the Patentee

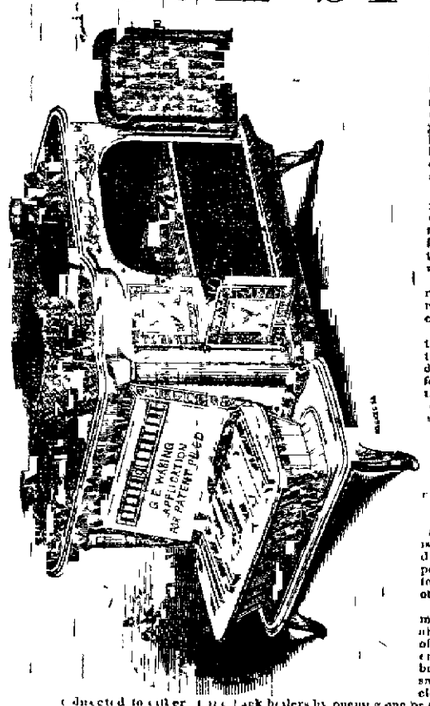
REPUBLIC AIR-TIGHT

COOK STOVE.



THE subscribers in offering their new Stove called the "Republic" of which the annexed engraving is a correct representation to the consideration of the public do not deem it necessary to recommend as superior to every thing else or a cure for all the ills of life; yet feel that persons of good judgment and correct taste will not withhold their approbation, but will, at least on trial find it all they want of a good cooking stove.

Believing that those who thoroughly examine their stove will not seek a better one, they would offer to those unacquainted with it the following reasons why they expect to share freely the favors of those who wish to purchase

1 Its general economy of arrangement comely proportions ornamental appearance, and heavy castings.

2 The particular construction of the top plate, by which either of the two front holes may be enlarged a diameter from three to four inches, for the accommodation of brass kettles, or other large bottomed vessels or they may be united by using the two full-out pieces, forming one hole, or if two sixty-one inch eleven in the No 8 or 8 inch ring the ruby affording a place for a piece of an unusually large, at the same time exposed part of the fire at the side or end of the fire.

A deep rim down with an arch which the furniture is supplied with heated air. This door, when let down to a horizontal position makes a convenient platform for a broiler toasting iron, or other utensil.

4 The flues or fire passages are much larger than in other stoves and so divided where for the direction of the current to be changed thereby ensuring a full and free draft over, behind, and under the oven the smoke pipe, when the dampers are closed for the whole force of the fire to circulate around the oven.

5 The upper side of the oven top is ventilated and covered with a non conducting cement thereby preventing the top of the oven from becoming so intense a heat—a difficulty much complained of in reverberatory flue stoves.

6 The oven bottom is made thoroughly hot by the large space allowed to the flues through which the heat passes in its way to the exit pipe and also by the pressure on the stove bottom caused like the oven top with non conducting cement which prevents the loss of heat downwards.

Also, every description and pattern of cooking stoves to be found in this market *without any exception* together with every article usually kept in a stove establishment.

A. NOYES & CO.,

Nos. 17 and 19 Central Street,.....BANGOR.

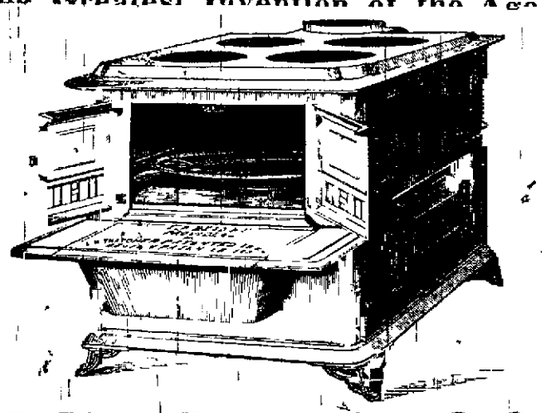
sep 6

E. T. ARCHER'S

Hot Blast Air Tight

COOKING STOVE.

The Greatest Invention of the Age



A New Pattern for 1849.

AMONG a host of competitors, THIS STOVE for its superior advantages took the first premium at the American Institute, city of New York, at the Hartford County Fair Connecticut, at the Worcester County Mechanics and Franklin Institute Philadelphia.

One very important improvement in this Stove is the patent *Broiling Chamber* (see cut) by which broiling is done to perfection from four to six minutes retaining the juices and giving steaks the same fine flavor and tender result as the best charcoal broil (it being equally well adapted to toasting roast meats) by a full draft of the fire arch passing through the broiling chamber and effectually carrying off the steam which usually arises from broiling. The broiling department is always ready to be used without disturbing the fire required for other purposes, and not interfering with any other part of the cooking.

The fire reaches the entire oven and passing directly around the oven applies the heat to all parts alike—being for Baking not equalled by any Stove in use. *Warrant it as above for thirty days.*

Holden's Alterative and TONIC MIXTURE,

IS the best combination known for changing the unhealthy secretions of the Stomach and giving strength to that organ, and for removing many troubles which are often attributed to impurity of the blood.

Its action is that of a mild Alterative and Tonic, restoring health and strength often we should produce any sensible evacuation, and will not leave behind any unpleasant effect on the constitution.

By its use the appetite becomes regular and good, digestion perfect, sick head ache and many nervous disturbances growing out of imperfect digestion are generally cured persons of debilitated constitutions become healthy and strong by its use.

By reason of the sympathy between the stomach and the skin many diseases of the latter grow out of a morbid action of the former, even when the ordinary symptoms of Dyspepsia are wanting and are cured by this medicine.

Many troubles of children, supposed to arise from worms are caused by a deranged state of the stomach and are removed by its use. Persons both adults and children feeble by protracted illness on the same principle are restored to health and vigor by taking it.

It contains no poisonous ingredient, and cannot in any case do harm.

Home Testimony

We, the undersigned have ourselves or in our families used Holden's Alterative and Tonic Mixture and are satisfied it is a very valuable preparation for the cases for which it is recommended.

DR. PEARSON'S

CARMINATIVE BALSAM.

Great Cholera Preventive.

THIS article should be in the possession of every person travelling. It has never been known to fail of producing the happiest results in cases of Cholera Morbus Diarrhœa, &c and has during the prevalence of the CHOLERA in this country been performing wonderful Cures,—though it is recommended more particularly as a PREVENTIVE but is useful in any stage of the complaint. If taken immediately upon the appearance of the Diarrhœa—which is a promontory symptom of Cholera—an attack of this fearful and fatal disease may be prevented. In Cholera Morbus and Summer Complaints of children it has no equal. Dr P has made use of this remedy in his practice for near 10 years with the most remarkable success. Price only 25 cents per bottle.

It is decidedly the most beneficial remedy for the cure of Dysentery, Cholera Morbus and Summer Complaint, that is known to man. Parents will find it the best medicine that can be used for young children and infants. And every person who is travelling in the summer months should not be without a bottle of it in their possession, as it is an infallible remedy against the change produced in the system by drinking bad water.

We annex the following certificate of Mrs A M Sanford, of New York in reference to the Carminative Balsam. We might add a long list, but consider this sufficient.

This is to certify that I have used Dr Pearson's Carminative Balsam, and confidently believe it to be the best medicine that can be used for fever and diseases for which it is recommended to all ladies who are travelling in the summer months, and mothers for the fretting and crying of infants or which it is a certain cure

PATENTS.

American and Foreign Office.

AGENCY FOR BUSINESS

With U S. Patent Office,

WASHINGTON

NO 22 STATE STREET, BOSTON.

THE subscriber was appointed by the Commissioner of Patents Agent of the U S Patent Office, in accordance with the 10th Sec of Act of 1837.

Having relinquished the Agency for the transmission of Models and adopted a more expeditious mode of sending them in the Patent Office, *where by a Patent may be procured about six weeks earlier* he continues to forward them free of expense—to prepare Caveats, Specifications Assignments and all the necessary Papers and Drawings for Patents, and to give advice on legal and scientific matters respecting the same. Patents secured in Europe and other countries.

By application at this office, inventors are saved the time and expense of a journey to Washington and delay there as well as all personal trouble in obtaining their patents. They also have the advantage of *verbally* explaining their inventions and of consulting in respect to them, *matters, in general of paramount importance in order to obtain correct specifications and claims.* The experience of the subscriber, an extensive collection of rare works of casions &c, on mechanical subjects the Patent Laws and patents of different countries, collected at much expense during the long time this office has been established, together with accounts here kept of inventions patented at Washington enable the subscriber to afford to inventors deserving of procuring Patents assistance and information which in other respects might be difficult of attainment.

R H EDDY Solicitor of Patents

WASHINGTON, JULY 21, 1849.—

During the time I occupied the Office of Commissioner of Patents R H EDDY, Esq, of Boston, did business at the Patent Office as Solicitor for procuring Patents. There were few, if any, persons acting in that capacity who had so much business before the Patent Office, and there were none who conducted it with more skill, fidelity and success. I regard Mr Eddy as one of the best informed and most skillful Patent Solicitors in the United States and have no hesitation in assuring Inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their applications in a form to secure for them an early and favorable consideration at the Patent Office. EDMUND BURKE,

Late Commissioner of Patents

Aug 7 1849 1Sept 1850

NOTICE.

BOOK BINDING.

I WOULD most respectfully suggest to my friends and those who have usually patronised me that I still continue in the Binding line at the old stand called the East Side Bookstore and Bindery—now called the East Side Book Bindery at which place I shall stock out a short time and shall be most extremely happy to see my old friends and customers bringing in their Periodicals, Music &c to be bound which shall be done in a neat and faithful manner as heretofore as any other binder in Bangor if not a cheaper rate.

P S. Persons correspond with the timer and I defy competition to come out with your proof Specimens of binding can be seen at my Bindery. Orders from the country punctually attended to.

☞ My friends and the public generally will please receive my sincere thanks for their patronage during my sojourn in the city.

Yours Respectfully

oct 31 W F STANWOOD

Whig and Courier.

JOHN S. NEWBURD, Editor.

THURSDAY, DECEMBER 6, 1849.

☞ The Portland Argus, unlike the Democrat in this city, urges upon the Senate, a general rejection of nominations to public office, made by Gen. Taylor. It assumes the position, that every officer who has been removed, must be adjudged guilty of either defalcation, negligence, or unfitness, and that the Senate must first settle the question as to this guiltiness, before confirming any of the nominations.

This strikes us as being particularly unfavorable to those officers who have been removed, since it hardly could be supposed that after the long continued proscription of the Whigs from office, by the party which has been in power, would not be followed, on the incoming of a Whig administration, by something like an equalization of power, to say the least, even if the example of former administrations should not, indeed, be followed, in placing its own political friends in offices of trust and responsibility.

It is, as every one knows, a part and parcel of the loco creed, that the offices of right and of necessity, belong to the successful party, and how they can expect to hold others to any other practice, is to us passing strange. We do not see how they dare hold up their heads, and demand it. We might as well expect them to oppose a revenue tariff, or any other measure which they have advocated, if the same should happen to be adopted by the Whigs.

But it may not, after all be so very difficult for the administration to show a pretty long and pretty convincing list of causes for removals, even upon the ground assumed by the Argus, enough, at least, to rake the loco Senators desire to have no more reports made public, as we notice that the N. Y. Tribune's Washington correspondent has seen a list of *twenty-four* defaulters in sums varying from $22,000 to under $100, whose accounts have been transmitted from a single Bureau to the Solicitor of the Treasury, for suit. This list, he adds, will be largely augmented by the names of others that will be sent to the Solicitor, in a few days, from other accounting Bureaus.

A few budgets of this sort, cannot fail to convince the country, that there was *some* occasion for removals, aside from the equalization of the offices, and aside from party influence.

We think it quite apparent, from the general tone of the loco press, every where, except in Bangor, urging upon the Senate, the rejection of the nominations made by Gen. Taylor, the effort will be a systematic one, and apply to a general rejection. In opposition to the confirmation of some of the nominations, it is urged that the persons appointed by Gen. Taylor are not qualified for the office, or that they have abused their trust. If it can be established that any officer appointed by Gen. Taylor, is not qualified for the discharge of the duties of the office, no one will have a right to complain. Should any public officer has finessed or cheated the administration, or has abused his official position, so that the public interest has been sacrificed, or the personal duties of the office improperly or partially administered as to render obnoxious to censure the person filling them. If any of these charges are made out against a person holding office, it would be the duty of the President to dismiss him. If they can be established against any one whose appointment should come up before the Senate for confirmation, he should be rejected.

But beyond this the Senate has no rightful power to go, and for it to reach forward to the political sentiments of the nominees would be an arbitrary stretch of power not contemplated by the constitution. The tyranny of party may demand this of the Senate, and by the clamors of the press does demand it, and the Senate may feel bound to heed the demand, at least so far as to reject some of the more prominent appointments which have been made from each of the States, and thus appease its party, and show the strength of the loco party in the Senate.

Such a discrimination as this will subject Senators to many personal advances on the part of the nominees and their friends, and to the resolving of the whole matter into a personal affair, which must be equally offensive to the country with an indiscriminate party movement, and greatly more annoying to Senators themselves. The whole duty of the Senate is to look at the character and qualifications of the nominee. If these are such as the office he is nominated for ought to have, it is their duty to "advise and consent" to the appointment. Not to do so because the person who was removed to make place for the new nominee, was the party friend of the major ty of Senate, or for any other mere party or personal reason, is to commit a wrong upon the nominee, is to attempt to do that which they have no Constitutional power to do, and would betray that they were governed by a spirit of faction.

BALTIMORE, Nov. 30.

Hon. Henry Clay arrived in this city yesterday, and was warmly welcomed by thousands of his friends.

Mr. Clay addressed the people to-day from Barnum's Hotel.

He alluded to the Slavery question, and said there was unnecessary agitation upon the subject. *The evil could never exist in California and New Mexico.* The cool climate, the business of the country, the habits and pursuits of the people forbid it.

He then spoke of the importance of the Union, and said that, contrasted with it, the slavery question sank into nothing. Under all circumstances, he would stand by the Union.

☞ The telegraphic wires were down south of Boston, so that the Boston papers of Tuesday, had no despatches from Washington. There was no communication with Portland, yesterday, so that we are without our regular despatches,

The Governor of South Carolina devotes about a column, in his message, to federal relations. He also discourses against the aggressions of the North and of danger to themselves and the Union in the persistance of their courses. He approves of the plan for a Southern Convention in case Congress passes the Wilmot Proviso and recommends measures for the reorganization of the militia and an appropriation of $50,000 for the purchase of arms, ammunition, &c.

☞ We have received a neat quarter paper published at the Gorham Seminary entirely filled with contributions from the pens of those now or but recently connected with that institution. It is proposed to publish a sheet of this kind once each quarter, the object being to encourage the members of the Institute to labor after excellence in English composition. The plan is a good one.

☞ Andrew Jackson Davis, whose 'Revelations' made so much stir some two years since, is now engaged, at Brooklyn in preparing a series of volumes to be entitled 'The Great Harmonia.' The first is soon to appear, and will treat of the laws of health, disease and cure.—Mr Davis professes to be able to enter into the clairvoyant state without the aid of magnetism.

Land Warrants are retailing at $126 each for the 160 acres. There are no 40 acre warrants in the market.

The number of forged warrants afloat is estimated at 30,000. This extraordinary fraud is the result, partly of the inexcusable delay of which the Patent Office has been guilty.

☞ The Lawrence Courier states the loss by the burning of the Merrimack House in that place at $25,000, and the entire loss by fire within a few months past, at a hundred thousand dollars. The place seems doomed to destruction by the terrible element. The amount of insurance on the Merrimack House and furniture, was $12,500 at six different offices.

The Rochester Advertiser of the 27th says:—'We have never seen a wheat crop at this season of the year look better or more promising than that which is now on the ground. The weather during the fall has been remarkably favorable to its growth, and it has apparently taken a deep and firm root, thus rendering it little liable to injury by the frosts of winter.'

☞ The New York Express says, that its Paris correspondent declares that the aspect of affairs is very gloomy, and there are serious threatenings of another Revolution. This is very possible, though the real demonstration is probably a good way off.

The New York Mirror speaks favorably of a newly invented machine for carving metal or wood, now in operation in that city. It is said to work with rapidity and excellence.

Hon. Joseph Hall, formerly of Camden, in this State, has been nominated as the democratic candidate for Mayor of Boston. Bradford Sumner is the free soil candidate.

☞ Wm. Ferd, Esq., late editor of the Monitor, has been appointed postmaster at, Fall

Rail Road.

MR. EDITOR:

The completion of the road and the running of the cars into Waterville has, I perceive, aroused the citizens of Bangor to a sense of their duty and their interest in the advancement of internal improvements, and not only do the citizens of Bangor see and feel the absolute necessity of railway and steam communications between the two great rivers, but those also of Somerset county are wide awake and ready to engage in the enterprise. Meetings have been and are now being held by the people of many of the towns in this county, taking into consideration the probability of extending the road from Waterville through to Bangor with all possible speed. The benefits resulting from the building of this road not only to stockholders but to the whole interior of the State are sensibly foreseen, providing it runs through that portion of the State the best capable of sustaining a road, which, of course, must be through that producing the largest amount of transportation.

I have no doubt that this road will be built, and that too, in a very few years, but where it will cross the country is a thing not quite so certain or so easily settled, yet one thing is very apparent, that the wisdom of the Bangor people will direct her to a route extending as far back as possible consistent with the public convenience. Such a route was, a little more than a year ago, examined by Mr. Appleton, a distinguished engineer, running from Waterville up the Sebec to Clinton, through Fairfield, Canaan, Portland, St. Albans to Exeter, south of the great hills in Dexter, and from thence to Bangor, through the most fertile and highly productive sections of this State, which route this gentleman pronounced preferable to the lower route already surveyed, not only in point of feasability in building but in the amount of transportat on which this road will command over the other. In some subsequent letter I shall endeavor to compare the merits of the two routes, when I think I can produce some facts that will fully substantiate the assertion of Mr. Appleton, and prove that the Upper Route, so called, has advantages far superior to the lower in very many if not in every respect.

At the time of this examination a laudable zeal was aroused in the towns along the projected route, meetings were held and resolutions adopted urging the necessity of the road and the practicability of building the same, but owing to the heavy pressure in the money market, and the conviction that nothing could be done until the A. & K. road should be completed, the interest in a measure abated, and has lain dormant until the present time. However the people are again wide awake, and as has been remarked, ready to engage in the work when an organization shall be effected under the charter. At least this is the fact on this end of the route and probably as on the other

My object in writing this letter is to stir up the people in Penobscot and give to the ball that was started a year ago a new impulse. In my letters which I may write hereafter I shall discuss more fully the advantages of the Upper Route—give some statistics and calculations of the amount of transportation which this road will receive, with some general reasons why this road will be superior to the other. And here I would say that the opinions and reasons given are not those of a single individual, but those of the whole county of Somerset. In conclusion I would recommend to those towns interested in the Upper Route, that they proceed immediately to call meetings and draft resolutions, and cause the same to be published, and thus rouse up again the old spirit. If this be entered into *heartily* there is no doubt that success will crown their efforts. SOMERSET.

Dec. 3, 1849.

Ventilation.

Public rooms, lecture rooms, churches, concert halls, &c, above all, school rooms generally, are badly ventilated. The general plan of these is to hold many persons; and the idea of the architect is so to arrange the seats, that the greatest possible number may be gathered into a given space.

A part of these pages on respiration were read as a lecture before an associated audience, which assembled in a hall forty-seven feet long, thirty-seven feet wide, and nine feet high, measuring 15,650 cubic feet. This room is made to hold five hundred persons, when filled; and usually from three to four hundred meet there. In the former case there are thirty-one feet and in the latter thirty-nine to fifty two feet of air for a person. [Seven to ten feet are necessary for each person per minute.] The sittings of this society vary from one to three hours.*

School-houses seem to be as imperfectly supplied with air as public halls. It is rare that one enters a school-room from the fresh air abroad, after the scholars have been in a few minutes, without perceiving the foulness of the atmosphere within.

A room thirty feet square is ordinarily supposed to be large enough for eighty or ninety children; and if the room be nine feet high, this will allow eighty or ninety feet of air for every child, which is sufficient for their respiration twelve or thirteen minutes. The air of these rooms becomes loaded with carbonic acid gas, with the foul secretions of the lungs, and the excretions of the skin. It is offensive, so much so as to sometimes produce sickness and faintness in those who enter from the external air.

Not the least remarkable example of the power of habit is its reconciling us to practices which, but for its influence, would be considered noxious and disgusting. We instinctively shun approach to the dirty, the squalid, and the diseased, and use no garment that may have been worn by another. We open sewers for matters that offend the sight or a smell, and contaminate the air. We carefully remove impurities from what we eat and drink, filter turbid water, and fastidiously avoid drinking from a cup that may have been pressed to the lips of a friend. On the other hand, we resort to places of assembly, and draw into our mouths air loaded with effluvia from the lungs, skin, and clothing of every individual in the promiscuous crowd—exhalations offensive, to a certain extent, from the most healthy individuals; but when arising from a living mass of skin and lungs, in all stages of evaporation, disease, and putridity, prevented by the walls and ceiling from escaping, they are, when thus concentrated, in the highest degree deleterious and loathsome.'

Jarvis' Physiology.

---

*The effects of breathing the same air again and again, are well illustrated by an incident that occurred in one of our halls of learning. A large audience had assembled in an ill-ventilated room, to listen to a lecture: soon the lamps burned so dimly that the speaker and audience were nearly enveloped in darkness. The oppression, dizziness, and sickness were so intense, that in a few minutes after the lamps were observed to rekindle, owing to the exchange of pure air on opening the door, which supplied to them oxygen.

Cutter's Physiology.

Defence of American Interest.

To read the Washington "Union" one would think that in American labor there was something wrong, and that it was a crime rather than patriotism to try to make the iron we ride over, or run with, or daily use, or the clothes that keep us warm. The men who embark their hard-earned money in mills, are daily denounced as monopolists, or *quasi* robbers, and every effort is made to make them odious or unpopular. To be an American manufacturer is to be in Union parlance, a plunderer, a thief of other people's fruits of industry, a quarterer upon other people's labor. Through all the veins of that print, and of most other such prints, there runs a bitter hostility to American labor, American work and workmen, or the employment of American capital in such work, or for such workmen. Why is this so? This ever prominent hostility of such persons to American labor, and to the employment of that labor by American capital, constantly reminds us of the early and later colonial history of this country, when British Governors and English presses manifested just the same sort of hostility. The great struggle of the British Governors was to prevent the American colonies from making even a hob-nail, much more a yard of cloth; and there was a bitter bewailment sent to England, when we of New York, succeeded in making homespun, and so saved the necessity of buying it from England. [See the lately published Documentary History of New York.]

We took a walk over to the Appraiser's Department of our city, yesterday, in the Public Stores. It was a gratification to us to see so many signs and representatives of the large commerce we had with the wide world; but when we stepped out and were met by some workingmen friends, who reminded us winter was coming, and they would be happy if we could find for them something to do, the gratification was somewhat lessened. The rolls of patent leather we saw there imported from France and Germany if they had been made by the hands of those our friends, we could not but think would have given *them* something to do. The rich boxes of note paper, fancy paper, &c., if they had been made in American paper mills, by American hands, would have created for our friends employ. Then the costly silks, wrought by Lyons fingers, if from our own shops, wrought by American hands, would have kept a whole army busy.

As it is, our gold and silver paid for them, and another people lived upon it at our expense. The woollen department led to some reflections. There, perhaps, was the fleece of a North Carolina sheep. It had gone to England. North Carolina corn, perhaps, had fed the British workmen who made it. The fleece and the corn, after being freighted two ways, 6000 miles and over, paying freight, commission, profits and insurance, had come back again in this form, and was before us. Boxes of false hair were under the examiner's investigation. One would think Americans could furnish their own false hair; but, if any one thinks so that one thinks wrong. But, in short, the more we reflected upon the demand for employment out of doors, and the immense amount of that *foreign* employment rolled up in little masses and packages in the custom-house departments, we could not think the Union was exactly right, or that the employment of American labor was altogether wrong, and a crime.

We can never help thinking, in this business of American labor, that there is a foreign party in this country, and a home party. To define which is which might be severe, but any body can guess.—[N. Y. Express.

BY THE LAST MAIL.

DR. PARKMAN.—The Boston Atlas of Tuesday, says;

Yesterday afternoon, between 1 and 2 o'clock, Professor John W. Webster was brought up before the Police Court, Justice Cushing on the bench, upon the charge of having wilfully murdered Dr. George Parkman, on the afternoon of the 23d ult. The warrant issued for his arrest was read to him by the Hon. Franklin Dexter, who appeared as his counsel, and by his advice and consent, he waived an examination. He was then remanded back to jail until the first Monday of January next, at which time he will be brought before the Municipal Court to hear the result of the investigation of the Grand Jury in reference to the charge. Prof. Webster looked about the same as usual, appearing perfectly calm without any perceptible agitation.

We understand that he asserts his innocence, and does not believe that the parts of a human frame found in the apartments occupied by him are portions of Dr. Parkman's body, but on the contrary, accuses Littlefield of placing the disedvered parts where they were found, for the express purpose of obtaining the large rewards offered, and implicating him (Webster.) His wife is very anxious to see him, but her friends have dissuaded her from visiting him, at present.

She sent to the Marshal's office, yesterday, a basket of books, and some articles of comfort, which were forwarded to the Jail for him.

Mrs. Miller, who sought, by exhibiting the semblance of suicidal preparations at Niagara Falls, to conceal the degradation and disgrace involved in the abandonment of her husband and children to become the paramour of the villian Blackmer, was arrested, says the Rochester American of Saturday, at Syracuse.

☞ Mr. W. C. Ballard will deliver a lecture before the Lyceum on this evening on the subject of Mnemonics or artificial memory, in which he will unfold certain laws showing how memory may be subjected to the human will. He professes to have made important discoveries in this matter, varying considerably from the commonly received doctrines upon the subject and which he will explain and illustrate by various examples and tests. The lecture will be of an interesting character we have no doubt, and we bespeak for the lecturer a full house and close attention

The English Press on Canada Annexation.

* * * * Annexation may probably come at last, but assuredly, in the meanwhile, not one of the three parties interested in the question is ripe for it. The pride and prejudices of the English nation are unquestionably against it. * * * *

Let us, however, suppose a peaceable annexation of the Canadas to the great Federal Republic, and glance at its probable results, as they would affect the different parties interested. It must be a peaceable one, brought about by a friendly negotiation. If not, England will assuredly fight, and whatever be the final issue, the other certain results will be much spilling of blood, and a maulet of not less than a hundred millions on each of the belligerents, with the conversion of Canada into a battle-field of several years, retarding its material prosperity for some quarter of a century.

As to England, in our humble opinion she will be the greatest gainer of the three by annexation. She will be relieved at once from the heavy load of responsibility with which she is now burthened in her impossible attempts, at the distance of 4000 miles, to govern wisely a free people whom her statesmen never see, and of whom they know nothing beyond what they [illegible]

New Mexico will form a State Constitution and ask for admission into the Union in the course of another year. Mr. Skinner, a lawyer residing at Santa Fe, and originally from Connecticut, has visited Washington for the purpose, it is said, of making some arrangements on this subject. He has stated that New Mexico would not insert in her Constitution any article excluding slavery. The great difficulty in regard to New Mexico is the question of boundary,—Texas claiming the best part of the country. It is the opinion of many that the great battle between freedom and slavery, is after all, to be fought during the settlement of the Texas boundary question. The last administration did all in its power to bring New Mexico within the jurisdiction of Texas, by sending a portion of our troops to overawe the New Mexicans, and enforce the claims of Texas. General Taylor very properly defeated the project of the Polk administration, by abolishing the military department, which was to embrace a good port on of New Mexico.

FIRST TOWN IN AMERICA.—The National Intelligencer relates the following very curious facts, which will be news to many of our readers:

It will seem curious to those who are not aware of the fact, that the first towns built by Europeans upon the American continent were at St Augustine, in East Florida, and Santa Fe the capital of New Mexico. The river Gila was explored before the Mississippi was known, and gold was sought in California long ere the first white man had endeavored to find a home on the shore of New England. There are, doubtless, trees standing within the fallen buildings of ancient Panama, that had commenced to grow when the sites of Boston and New York were covered with the primeval wilderness.

[For the Whig and Courier.

Sorrows of the Christian.

Father, although it be severe,
The burthen I will bear,—
If all my trials thou art near,
In all my griefs to share.

Tough thorns and briars strew my path,
And sighs in anger flown—
O, may I feel 'tis not in wrath
Thou sun less sorrow down.

It is to lead my wayward heart
To put its trust in thee—
To feel that while my Friend thou art,
No harm can come to me.

Father, I bend and humbly kiss
The hand that gave me pain;
They only know what pleasure is,
Who bear—but never complain. D. C. C.

Humility.

The bird that soars on highest wing
Builds on the ground her lowly nest;
And she that doth most sweetly sing,
Sings in the shade when all things rest.
In lark and nightingale we see
What honor hath humility.

Montgomery.

OAK HALL, Boston.—Mr. Simmons is ever making some improvements on his beautiful Clothing Depot. He certainly keeps pace with the times. Fall and Winter Clothing of every description he sells lower than ever.

Per order
SILAS ALDEN, Secy.

THANKSGIVING AT MR. HIGGINS'.

BROWER, Dec 1st, 1849.

The gentlemen employed at Mr W C Bruce's Mills, in this village, acknowledge with gratitude, the liberal hospitalities extended towards them, at their boarding house, on Thanksgiving days. As the appointed day drew near, we began to think of home, sweet home, and the pleasing associations connected with it our daughts reverted to the by gone Thanksgiving days that we had enjoyed with dear friends around us, only we had a sent this interesting season and we could not help regretting that our present position rendered it inconvenient for us to return to those cheerful firesides, again with those loved ones to assemble around the festive board, and with them spend the evening in cheerful ness and social joy. But as we were situated, as it were, among strangers, we expected of course, to forego the extra "fixings" usual for Thanksgiving, imagine, then, our surprise on entering the dining room, at the usual dinner hour, to find the table laden with a number of various delicacies,—such as roast Geese, roast Turkey, Plum Puddings, and a variety of Cakes, Pies, &c.—all of which were sufficiently palatable to suit the most refined taste, and most acceptably did they come to a crew of men whose appetites were sharpened by a hard forenoon's work. The entertainment was enjoyed with an enthusiasm worthy of the occasion,—all passed off smoothly, and at 12 1-2 o'clock we adjourned sine die, to the mill, with our appetites satiated, our spiritual systems encouraged and strengthened. A regular Thanksgiving dinner, provided for a crew of fifty men, is what we don't meet with every day. Our thanks are due to Mr. and Mrs. [illegible] for their favors in general, and this in particular. Long may they live and prosper. IN BEHALF OF THE CREW.

C. P. FESSENDEN'S

WRITING ACADEMY open day and evening, at *No 74 Main Street.* Mr. FESSENDEN, thankful for the flattering patronage bestowed upon him (and having located himself permanently in this city, as a teacher of penmanship) would solicit a continuation of the patronage of all those who wish to acquire an easy, rapid and graceful system of writing, fitted for the counting-room, or for ladies in epistolary correspondence. Those wishing to fit themselves to teach, will be fitted upon reasonable terms and under with exactness and despatch.

THE REV. JOHN SEGER

Of Jersey City, an old and highly respectable clergyman of the Baptist Denomination, handed in the following certificate at Dr. S. P. Townsend's office. It speaks for itself

JULY 11, 1847.

DR. S. P TOWNSEND—Dear Sir: I am constrained to give you a statement of the benefit I derived from using your Sarsaparilla, believing by so doing, I shall render a benefit to those who are suffering as I have been. I was reduced for many months by the Dyspepsia, so much that it was with much difficulty for me to walk or keep about. I also had a tetter, which covered the most part of my body which was extremely troublesome and sore; it got to be almost a scab. I used quite a number of remedies for both the complaints, but received little or no benefit, until I took your Sarsaparilla, which, through the kindness of Providence has restored me to more than my usual health. I am now enjoying better health than I have for a number of years. I am now 60 years of age. I believe it to be an invaluable medicine, and recommend it to all numerous complaints which it is very large, as I have seen it cure a great many cases. I hope this hasty sketch may be as much benefit to you as your medicine has to me.

JOHN SEGER, Jersey City.

STAMMERING CURED.

THE undersigned would respectfully announce the arrival in this place and has taken rooms at the Penobscot Exchange, where he may be consulted, for the purpose of effectually curing those addicted to

Stammering or Stuttering,

who wish to be relieved. So confident is he of success, that no pay will be required until the utmost satisfaction is given. Those of this city, and the adjacent towns, who are afflicted in the above manner, have now an opportunity of receiving and seldom offered. His rule is so simple that a child five years old will perfectly understand it, and yet so efficient that he defies any person to stammer and apply it. He has permission to refer to the following medical and other eminent gentlemen, who have witnessed its successful application in several cases:

J. KINGSBURY, for
A. C. FORBES.

Refer to G. DAVELS, M. D., Portland, Me.
J. T. GILMAN, M. D.,
E. CLARK,
M. DODGE,

RICHARD MOODY, M. D., Belfast.
WM. R. HUNTER, Warren.
A. J. HARLOW, Waldoboro.

STAMMERING.

CASTINE, (Me.) Nov 10th, 1849.

It is with the most heartfelt satisfaction, and with gratitude to God, that I have the privilege of stating to the community and to all who have known me for years, that by the application of the rule of Dr. A. C. Forbes, I have received, and I firmly believe, a perfect cure from stammering. I have been afflicted, and hundreds in his region will testify, from a child, with this habit, and to such a much as to be almost quite ineligible! But in five minutes after comprehending his rule, I was perfectly free to speak and converse with ease, and would urge *all* who are so afflicted to make application to him.

His method is perfectly easy of application, and I firmly believe it to be an *infallible* remedy.

To all who try it, I *ask perseverance* in the application, as you would to correct any other bad habit, and *it will not fail you.* MASON H. WILDER.

Attest,—H. N. LANCASTER,
American House, Belfast.

Wilder's Salamander Safes.

☞ The Following Letter from the Superintendent of the Maine Telegraph Company, is an other proof of the superiority of JOHN E WILDER'S Safe over all others —

BANGOR, Oct 24, 1849

John E Wilder Esq

Dear Sir—The Safe I purchased of you was exposed to a great degree of heat at the burning of the Telegraph Office, in this city It was in the fire six hours, the books and papers were uninjured, and the damage to the Safe very slight, although it fell from the second story to the basement of the building The little repairs necessary to the Safe have been made, and we shall not need to return it It is still as good as new
Respectfully yours, JAS EDDY

Wilder's Patent

GREAT COUGH REMEDY!

AYER'S CHERRY PECTORAL

For the Cure of

COUGHS, COLDS, HOARSENESS, BRONCHITIS, CROUP, ASTHMA, WHOOPING-COUGH AND CONSUMPTION.

THIS truly valuable Remedy of all diseases of the Lungs and Throat has become the chief reliance of the afflicted as it is the most certain cure known for the above complaints While it is powerful remedieal agent in the most desperate and at most hopeless cases of *Consumption*, it is also, in diminished doses, one of the most agreeable of family medicines for common coughs and colds—Read below the opinions of men who are known to the world, and the world respect their opinions

PROF CLEAVELAND, of Bowdoin College, Maine Writes—"I have witnessed the effects of your Cherry Pectoral in my own family and that of my friends, and it gives me satisfaction to state in the face of this, no medicine I have ever known has proved so eminently successful in curing disease up of the throat and lungs"

REV DR OSGOOD Writes—"That his daughter after being obliged to keep the room four months, with a severe settled cough, accompanied by raising of blood, night sweats, and the attendant symptoms of Consumption commenced the use of the 'Cherry Pectoral,' and had completely recovered also that he considers 'Cherry Pectoral' the best family for pulmonary complaints ever given to the public"

DIRECT EVIDENCE

Springfield Mass Nov 27 1848

Dr Ayer Dear Sir—For two years preceding the last of November 1847 I had been induced very low with a very severe cough, accompanied by spitting of blood and profuse night sweats By the advice of my attending physician, I was induced to use your "Cherry Pectoral," and continued to do so till I consider myself cured, and ascribe the effect to your preparation JAMES RANDALL,
At the office of Hon Geo Ashmun mem Cong,
Springfield Mass

DR PERKINS, President Vermont Medical College, One of the most learned and intelligent physicians in the country, considers it a compound of rare excellence for the cure of that formidable disease, Consumption !!!

The Canadian Journal of Medical Science States that, "the prevailing Asthma of the whole mountainous region has yielded with surprising rapidity to Ayer's Cherry Pectoral, and we cannot too strongly recommend the skillful preparation to the Profession and public generally."

From the "LONDON LANCET"

"Ayer's Cherry Pectoral is one of the most truly valuable preparations that has fallen under our notice After a careful examination of it we do not hesitate to say we have a large appreciation of its merits and the fullest confidence in its usefulness for coughs and lung complaints"

White's Hair Restorative:

A PURELY VEGETABLE COMPOUND

For Restoring, Beautifying Cleansing, Softening, and Dressing THE HAIR

THIS elegant preparation in fact taking the place of all other articles in dressing and dressing the Hair It prevents the Hair from falling off, promotes its growth, removes dandruff, and restores the natural and luxuriant growth of the Hair It will cause baldness It also removes pain and heat in the head, and is a sovereign remedy for all diseases of the scalp It gives the Hair a brilliant glossy lustre unknown to any other preparation and is the only healthy, vigorous appearance, No Lady's toilet can be complete Without this indispensable article

RECOMMENDATION

[Certificate of Dr PERRY, Portsmouth N. H.]

PORTSMOUTH Sept 29 1849

Mr J P MOSES, Agent for "White's Hair Restorative"—

Dear Sir—I deem it my duty to state some facts relative to speaking the inestimable value of White's Hair Restorative Several years ago, after a severe fit of sickness, my wife lost all of her hair, the scalp appeared glazed and, the hair grew out brash, and when it did start it was of a second quality, and for a long time there was apparently no action in the scalp After various applications I was induced to try the above mentioned Restorative and now after the use of a few bottles her hair has grown out as thick, as lustrous and of as beautiful a color as ever Furthermore, for a long time I have been afflicted with neuralgic and other pains in my head and I have found it the best external remedy I have ever tried, I can therefore cheerfully recommend it to all who are afflicted as above, as the best article I have ever seen
Most respectfully yours, &c

LATEST AND BEST IMPROVED

Patent Bedstead.

THE Subscribers have purchased the right of manufacturing and selling HINKLY'S IMPROVED PATENT BEDSTEAD for the city of Bangor

This improvement is so simple in its construction and consists in furnishing a substitute for Bed cords which shall be elastic and have all the advantages of a Slat or Sacking Bedstead while at the same time it serves to secure the joints and rails done exactly for them without cutting Can be fitted up in the best of order with much less time and labor than is required to put in a cord and when fitted gives a uniform, steady support and keeps the Bedstead in proper shape It cannot be doubted that this simple improvement will ere long take the place of every other method now in use We can confidently recommend the above improvement to our customers and to the public as the cheapest most substantial and best Patent Bedstead ever invented

The Public are respectfully invited to call and see for themselves SHAW & MERRILL

THE ASTOUNDING REVELATIONS that have been made during the past year of the efficacy and wonderful

Healing Properties

Of the greatest Medicine of Age

Stanton's External Remedy

—CALLED—

Hunt's Liniment,

Has astonished the world in the cure of numerous and most distressing cases that have baffled the skill of our most DISTINGUISHED PHYSICIANS and when they

HAVE GIVEN UP

Hear persons speak past the help of man HUNT'S LINIMENT has been applied, and the sufferer who has been given up to die has been restored to

PERFECT HEALTH,

A LIFE SAVED.

Most Wonderful Cure of a man 80 years of Age

In the month of November, 1846, I was attacked with inflammation in my great toe, which soon broke out in a running sore *Mortification ensued* and the first joint of my toe *came off* At this time was under the care of the best physician in the county—every remedy had been tried but without any help The agony of pain I endured no one can imagine In consequence of my inability to walk I was moved from my farm to the city I raise no blood, and my cough has left me You can well imagine that I am thankful for these results

Your obedient servant,

WM RUSSELL, 65 Catherine st.

RHEUMATISM

This is only one of more than four thousand cases of rheumatism that Dr Townsend's Sarsaparilla has cured Also most severe and chronic cases are weekly eradicated by its instrumentality in

James Cummings, Esq one of the assistants in the Lunatic Asylum, Blackwell's Island, is a gentleman speaks of in the following letter

Blackwell's Island, Sept 14, 1847

Dr Townsend—Dear Sir I have suffered terribly for nine years with the Rheumatism, considerable of the time I could not eat, sleep or walk I had the most distressing pains and my limbs were terribly swollen I have used four bottles of your Sarsaparilla and they have done me more than one thousand dollars worth of good! I am so much better—indeed, I am entirely relieved You are at liberty to use this to the benefit of the afflicted Yours respectfully,

JAMES CUMMINGS

FITS! FITS! FITS!

Dr Townsend not having testified his sarsaparilla in cases of Fits, of course the more he invented it, and was surprised to receive the following from an intelligent and respectable Farmer in Westchester County

Pathdown, August 13 1847

Dr Townsend—Dear Sir I have, for upwards of seven years of my life, been afflicted almost every thing to bear, but without success, at last, although we could find no recommendation in your circulars for cases like ours, we thought, as we were very delicate baby, we would give her some of your Sarsaparilla, and she very glad we did, for it not only restored her health but she has had none for three months, becoming ragged and hearty, for which we feel grateful, Yours respectfully,

JOHN BUTLER, Jr

FEMALE MEDICINE

Dr Townsend's Sarsaparilla is a sovereign and speedy cure for Incipient Consumption, Barrenness, Prolapsus Uteri or Falling of the Womb, Costiveness, Piles, Leucorrhœa or Whites, obstructed or difficult Menstruation, Incontinence of Urine or involuntary discharge thereof, and for the general debility of the system—no matter whether the result of inherent cause or causes produced by irregularity, illness, or accident Not any cure be more surprising than its invigorating effect on the human frame Persons all weakness and inactivity, from taking it, at once become comfortable and full of energy under its influence It immediately counteracts the nervousness of the female she is subject to, the consequence of barrenness It will not be ex ected of us, in case of so delicate a nature, to exhibit certificates of cures performed, but we can assure the afflicted, that hundreds of cases have been cured Thousands of cases where families have been with out children after using a few bottles of this sarsaparilla and have been blessed with fine healthy offspring

TO MOTHERS AND MARRIED LADIES

This extract of Sarsaparilla has been expressly prescribed and recommended to Females enfeebled by the critical period, "Return of Life" should neglect to take it, as it is a certain preventative for any of the numerous diseases peculiar to which females are subject at this time of life These period may be delayed *for several years by using this to excess* Nor is it less adapted for those who are approaching womanhood as it is the safest guard to against nature's cracks using the blood and invigorating the whole system, and is the prudence is valuable for all the delicate diseases to which women are subject

It cleanses the whole system, renews permanently the natural energies, and by removing the impurities of the body, not in the least changing as to produce subsequent relaxation—which is the case of most medicines taken for female weakness and disease By using a few bottles of this medicine, many severe and painful surgical operations may be avoided

GREAT BLESSING TO MOTHERS AND CHILDREN

It is the infinitude of mothers, that actual medicine for purifying the system, and relieving the sufferings attending upon childbirth ever discovered It strengthens both the mother and child, prevents pain and disease, increases and carries on the Food—it so which have used it think it indispensable It is highly useful both before and after confinement as it prevents disease and the effect was wonderful It seemed as if new life was put in me To using one bottle he will be a performance of my legs changed to its natural color, the pain left me, and two 50 cent bottles entirely cured me, to the astonishment of myself as the whole neighborhood *Have a Lameness* cured me I believe it is the most valuable preparations of the Sar

THE MOST VALUABLE PREPARATION of the Sarsaparilla and Yellow Dock, &c They generally put it up in 1 o pound shaped bottles, and some of them have stole and pop ed our advertisements,—they are worthless imitations, and should be avoided

An Invaluable Remedy

FOR Fever Sores, Rheumatism Swelling of the Joints and Limbs Swelling of the Tonsils or Sore Throat Chronic Eruptions of the Skin and all Scrofulous Diseases Rigid Cords occasioned by Colds or Strains, Stiff Neck Chilblains or Chopped hands, Sore or Inflamed Breast, Weakness or Pains in the Stomach, Piles, Corns, Warts, and Common Sores and Cuts and Bruises of all kinds

In bringing this article before the Public, we are aware that we labor under no small disadvantage amidst the multitude of "All Healing Ointments" and "Panaceas" that are now advertised as the *"most effectual"* and *certain cures'* for all diseases indiscriminately, to which man or animals are subject

A history of this Salve and the wonderful cures it has effected in the above complaints, will be found in a pamphlet accompanying each Box—a reference to which is invited before purchasing

We would only add that we have undertaken the task of manufacturing the above named Salve at no inconsiderable trouble and expense, not so much as a matter of speculation and pecuniary benefit as in compliance with the earnest and repeated solicitations of personal friends and those who have experienced its wonderful medicinal and all healing properties

To say, indeed, that we do not expect to realize handsome remunera ion for our services, would be alike reckless and untrue But we after certain reflection, feel we are richly paid, and the article sells very well, has an extensive sale—the Public are receiving great benefit and ample equivalent

As we have already intimated we do not and shall not call to our aid the empty *puffing of the Press,'* or the bought certificates' of individuals, and shall make use of them only so far as they have been of heretofore may be entirely *plaintive* and *unsolicited*

The Salve is now before the Public They, and they alone will decide upon its real virtues and medicinal properties To say less, were injustice to ourselves—to say more would be superfluous

Here are some of the many Certificates —

The subscriber was afflicted with a FEVER SORE upon his leg for about six years, and in the winter of 1845 it commenced swelling from the ancle to the knee After using many remedies without success I applied some Salve obtained of Mr J A McKenney and continued to apply it until I had used six bottles which entirely cured me and I have had no return of the disease since I would say that I know the above Salve to be a cure for Cossack, one of my family having used it for this purpose with complete success

DANIEL SEAVEY

Dexter (Maine) May 1846

This certifies that one of my sons having been afflicted with a Fever Sore for more than a year, and having tried various means to effect a cure, without success which cost me about forty dollars, I bought 4 oz of J A McKENNEY'S SALVE, which effected an entire cure in less than two months

SIMEON MARSTON

Gray May 11, 1846

BANGOR June 5 846

Mr McKenney—In going into the woods in the autumn of 1845 with the charge of quite a number of men for the winter lumbering operation, I was induced to take a few of the boxes of your Salve it having been recommended to me as one of the best remedies for accidents Cuts and bruises, and I found indeed, to my great satisfaction, that it was an invaluable article and made application of it in cases of Cuts Sprains and Bruises upon my cattle and found it equally beneficial It can truly be called the All Healing Salve

LYSANDER STRICKLAND

Manufactured and sold by McKENNEY & KIMBALL at Watertown Mass

Another Life Saved.

Read the following letter from a Clergyman of Camden, Me, to the Editor of the GOSPEL BANNER —

DOWN'S ELIXIR, OR A CURE.

BR DREW—being anxious to do good to my fellow beings as I have means and opportunity, I wish last winter and spring, I received very great benefit from the use of H DOWN'S ELIXIR

I had been troubled some weeks with a severe cold which so affected the vocal organs that it was with great difficulty I discharged the duties of my office My cold increased until I was completely prostrated by bleeding which ceased in a day, hard cough My appetite failed my strength wasted, and my flesh disappeared Seeing Wistar's Balsam of Wild Cherry recommended in the Banner, I procured a bottle and commenced using it, and continued its use until I had taken three bottles, when I became satisfied that it contained opium making a large amount of physic necessary, and also contracting the very organs that should be relieved I used other kinds of patent medicines, but with no good effect seven weeks I continued gradually to sink under my disease not the expiration of which time I was extremely weak, my skin dry and husky, and my feet and hands cold most of the time I had chills, heavy pain between my shoulders, and a distressing pain at the pit of my stomach My tongue was coated with a thick, wh to fur, bowels very irregular and costive, hectic fever, night sweats, dry hard cough, difficulty of breathing, and low spirits My friends at this time was so sore an I was, that it was with difficulty I could stand erect This was my situation when I commenced the use of H DOWN'S ELIXIR— And to my great joy, and the surprise of my friends I found that the use of it a few days had regulated my bowels equalize the circulation and produced a healthy moisture upon the skin I used three bottles in two weeks, which entirely removed the soreness and weakness from my stomach, gave me a good appetite, and greatly improved my strength I continued the use six weeks, using six bottles at which time I was able to resume my duties as a farmer, and have never known it to fail of doing good where the directions were followed

I have given it to my children in cold, and in a case of measles, and believe prove it is to recommend it to be

I therefore *cheerfully* recommend H DOWN'S ELIXIR to all who are afflicted with any of the diseases for which it is intended

Yours truly,

L TUTTLE

Camden, August 1849

Facts deduced from the foregoing letter

1st Down's Elixir is effective—curing consumptive cases when other medicines increased that difficulty

2d It is expectorant It equalises the circulation—restores a healthy temperature to the skin, and tone to the system

3d It removes soreness and weakness from the stomach—gives a good appetite, and restores strength to the system

4th It cures colds—is an effectual remedy for the measles, and proves ALL IT IS RECOMMENDED TO BE

It is sold by Druggists, and dealers in medicine throughout the country, and at wholesale and retail at proprietor's prices by DAVID BUGBEE G W LADD, CURTIS & PERKINS A P GUILD WM MANN G McFARLAND Bangor L Smith J W Curtis & Co Hampden Chas Johnson, J B Chick, Frankfort H P Fifield Bucksport, J Hooper Jr S P Hatch & Co Castine B Nourse, Geo Parcher, Ellsworth E P Butler & Co Orono, J & R Polk, H & J Y Richardson Oldtown, Wm O Poor, Belfast, Chas A Macomber R T Stocomb, East Thomaston

For the Good of the Many.

THE ASTOUNDING REVELATIONS that have been made during the past year of the efficacy and wonderful

Healing Properties

Of the greatest Medicine of Age

Stanton's External Remedy

—CALLED—

Hunt's Liniment,

Has astonished the world in the cure of numerous and most distressing cases that have baffled the skill of our most DISTINGUISHED PHYSICIANS and when they

HAVE GIVEN UP

Hear persons speak past the help of man HUNT'S LINIMENT has been applied, and the sufferer who has been given up to die has been restored to

PERFECT HEALTH,

A LIFE SAVED.

Most Wonderful Cure of a man 80 years of Age

In the month of November, 1846, I was attacked with inflammation in my great toe, which soon broke out in a running sore *Mortification ensued* and the first joint of my toe *came off* At this time was under the care of the best physician in the county—every remedy had been tried but without any help The agony of pain I endured no one can imagine In consequence of my inability to walk I was moved from my farm to the city I raise no blood, and my cough has left me You can well imagine that I am thankful for these results

Your obedient servant,

WM RUSSELL, 65 Catherine st.

RHEUMATISM

This is only one of more than four thousand cases of rheumatism that Dr Townsend's Sarsaparilla has cured Also most severe and chronic cases are weekly eradicated by its instrumentality in

James Cummings, Esq one of the assistants in the Lunatic Asylum, Blackwell's Island, is a gentleman spoken of in the following letter

Blackwell's Island, Sept 14, 1847

Dr Townsend—Dear Sir I have suffered terribly for nine years with the Rheumatism, considerable of the time I could not eat, sleep or walk I had the most distressing pains and my limbs were terribly swollen I have used four bottles of your Sarsaparilla and they have done me more than one thousand dollars worth of good! I am so much better—indeed, I am entirely relieved You are at liberty to use this to the benefit of the afflicted Yours respectfully,

JAMES CUMMINGS

FITS! FITS! FITS!

Dr Townsend not having testified his sarsaparilla in cases of Fits, of course the more he invented it, and was surprised to receive the following from an intelligent and respectable Farmer in Westchester County

Pathdown, August 13 1847

Dr Townsend—Dear Sir I have had seven, seven years of age, who has been several years afflicted with Fits we tried almost every thing to hire, but without success, at last, although we could find no recommendation in your circulars for cases like ours, we thought, as we were very delicate baby, we would give her some of your Sarsaparilla, and she very glad we did, for it not only restored her health but she has had none for three months, becoming ragged and hearty, for which we feel grateful, Yours respectfully,

JOHN BUTLER, Jr

FEMALE MEDICINE

Dr Townsend's Sarsaparilla is a sovereign and speedy cure for Incipient Consumption, Barrenness, Prolapsus Uteri or Falling of the Womb, Costiveness, Piles, Leucorrhœa or Whites, obstructed or difficult Menstruation, Incontinence of Urine or involuntary discharge thereof, and for the general debility of the system—no matter whether the result of inherent cause or causes produced by irregularity, illness, or accident Not any cure be more surprising than its invigorating effect on the human frame Persons all weakness and inactivity, from taking it, at once become comfortable and full of energy under its influence It immediately counteracts the nervousness of the female she is subject to, the consequence of barrenness It will not be expected of us, in case of so delicate a nature, to exhibit certificates of cures performed, but we can assure the afflicted, that hundreds of cases have been cured Thousands of cases where families have been with out children after using a few bottles of this sarsaparilla and have been blessed with fine healthy offspring

TO MOTHERS AND MARRIED LADIES

This extract of Sarsaparilla has been expressly prescribed and recommended to Females enfeebled by the critical period, "Return of Life" should neglect to take it, as it is a certain preventative for any of the numerous diseases peculiar to which females are subject at this time of life These period may be delayed *for several years by using this to excess* Nor is it less adapted for those who are approaching womanhood as it is the safest guard to against nature's cracks using the blood and invigorating the whole system, and is the prudence is valuable for all the delicate diseases to which women are subject

It cleanses the whole system, renews permanently the natural energies, by removing the impurities of the body, not in the least changing as to produce subsequent relaxation—which is the case of most medicines taken for female weakness and disease By using a few bottles of this medicine, many severe and painful surgical operations may be avoided

GREAT BLESSING TO MOTHERS AND CHILDREN

It is the infinitude of mothers, that actual medicine for purifying the system, and relieving the sufferings attending upon childbirth ever discovered It strengthens both the mother and child, prevents pain and disease, increases and carries on the Food—it so which have used it think it indispensable It is highly useful both before and after confinement as it prevents disease and the effect was wonderful It seemed as if new life was put in me To using one bottle he will be a performance of my legs changed to its natural color, the pain left me, and two 50 cent bottles entirely cured me, to the astonishment of myself as the whole neighborhood *Have a Lameness* cured me I believe it is the most valuable preparations of the Sar

NEW AND Important Discovery

GRAY HAIR can be restored to its original color, whether Auburn Brown or Black Sandy Light or Red Hair can be matched with any darker shade, surpassing in beauty even the most natural locks, retaining the gloss and softness of the original Hair, by using O M Ballard's

Permanent Liquid Hair Dye,

Of one preparation, which is entirely different from all other preparations of Hair Dye now before the public Is free from all injurious properties, which can be tested by taking a lock of the finest and most delicate Hair of an infant, and color it with the Dye which will not impair its gloss or its texture in the slightest degree, which is the best evidence which can be given that it is not injurious! On the contrary it improves the lustre of the hair, promotes its growth, and prevents it from falling out and unlike other preparations after the Hair is colored and dry, will not crock, fade or wash out

In short from its peculiar delicacy, softness, and easy application it is to the attention of all who may wish to improve the color of the Hair as it will make any shade from a white to a jet black It is now used to an unaccountable extent by persons who have prematurely turned gray and others whose Hair is of an undesirable color, which they restore or exchange for a beautiful Auburn Brown or Black, without any additional preparation or he slightest trouble
